

66-77 Fiberglass Bronco Parts

Full Hard Top Information

Our new top is like no other available for the Early Bronco! It features a built in headliner with bracing, removable side panels, steel reinforcement in all the important areas, and allows for the use of a steel or fiberglass lift gate. As with all our products, it is made using matched molds so you will have the nice finished surface on both sides with no fiberglass showing.

We plan to offer rear pillars, so the top can be ran without the sides, for those warm summer months! It could also be tied into a roll cage for a complete hard safari top look.

Pricing: without lift gate \$1,845 or with lift gate \$2,145.
